

Cellpose-SAM: total segmentation time for 2D images

Reference: Cellpose main a54cb48 ; bfloat16 network ; native scale (no resizing)

Bars/large markers: medians. Latency whiskers: repeat min-max. Speedup whiskers/dots: paired repeat range/samples.

Time differences compare medians. 5 synchronized repeats; batch size 8; RTX PRO 6000 Blackwell.

Public Cellpose test fixtures ; All candidate mask bytes match the reference ; Model loading and image decoding excluded
